

Pre-CP Student Training at the Long Mynd

Site Rules and Conditions of Access for BHPA Schools

IMPORTANT:

Training at the Long Mynd main launch is permitted only within the strict boundaries set out in this document. Any school or instructor operating outside these conditions does so without the authorisation of the Long Mynd Soaring Club. Unauthorised activity is a breach of the LMSC's site rules and may invalidate insurance cover.

1. PERMITTED TRAINING ACTIVITY

The Long Mynd is the club's prime soaring site. Access for pre-CP student training is granted exclusively for students who have reached at least Phase 6 (Pre-soaring — Mountain Route) of their BHPA Paragliding (Hill) Student Training Record.

The site is not available for introductory or elementary training: students must have completed Phases 1 to 5 before flying at the Long Mynd.

When training at the Long Mynd, instructors may work on any tasks from Phase 6 onwards that are appropriate to the conditions, the available airspace, and the student's stage of development. The table below describes the core soaring tasks for which the Long Mynd is suited, and which formed the basis of the club's consultation with its membership. Other important in-flight tasks such as 360 turns, descent techniques such as Big Ears and small canopy deflations may be addressed during training if conditions prove suitable.

Task	Title	BHPA Task Description (abbreviated)
(Phase 6) Task 23	Planned Approaches	Controlled landing within 20m of a designated target, at least 4 times. Techniques include constant aspect approach and S-turns. Instructor supervision advisory in nature.
(Phase 7) Task 24	Soaring Flight	Utilising ridge lift to maintain or gain height. Flying beats in a controlled manner with good lookout.
(Phase 7) Task 25	Top Landings	Understanding of all factors involved in top landings: site suitability, positioning, lookout, crabbing approach and abort options. Practical completion where conditions allow.
(Phase 7) Task 26	Flying with Others	Flying with other aircraft, showing good awareness of other craft and their characteristics.

2. INSTRUCTOR AUTHORISATION

Before conducting any training at the Long Mynd, every instructor (of any BHPA rating) must have:

- Participated in a cross-community briefing/discussion session involving representatives of the three aircraft communities at the Long Mynd: paragliding, hang gliding and sailplanes.
- This requirement applies to every new instructor joining a school teaching at the Mynd. Enhancing dialogue between our communities is an explicit goal of the introduction of these rules.
- Schools are responsible for arranging sessions with representatives of the other communities. The LMSC committee can help facilitate arrangements.
- The purpose is open communication, mutual understanding of each aircraft type's characteristics and needs, and effective propagation of useful education and accurate site knowledge.

3. MANDATORY STUDENT SITE BRIEFINGS

- Every student who is to train at the Long Mynd must receive a specific Long Mynd site briefing before any training flight takes place. This can be by whichever format is best suited to the student.
- The content of the briefing must be informed by the cross-community discussions and satisfy the needs of those communities. It must cover as a minimum: the mixed-aircraft nature of the site; respecting the hang glider airfield, landing and circuit protocols; sailplane circuit and avoidance protocols; parking arrangements; and the landowner relationship and access road etiquette.
- Schools must retain evidence that each student has received and understood their site briefing. This evidence must be retained with the same rigour as BHPA task completion records and may be needed to be made available for inspection in the event of any incident.

4. STUDENT NUMBERS AND SUPERVISION

- A maximum of 12 students under instruction may be present across all schools combined on any given day at the Long Mynd main launch, regardless of the number of schools operating.
- Students must be managed when in the air or on the ground.
- No more than two students may be airborne concurrently at any time.
- Every airborne student must be in radio contact with their instructor throughout their flight.

5. SEASONAL ACCESS RESTRICTIONS — 2026

- Pre-CP student training is not permitted on bank holiday weekends in 2026.
- This restriction applies to all weekend days within a bank holiday weekend and to the public holiday itself.
- The restriction will be reviewed as part of the end-of-season committee report.

6. SCHOOL EQUIPMENT AND PILOT IDENTIFICATION

- The use and positioning of any school flags, wind-blades or other ground equipment should be discussed with representatives of the hang gliding and sailplane communities as part of the briefing/discussion meeting.
- Students actively under instruction are required to use a distinctively coloured identification streamer. Specific arrangements will also be agreed as part of the briefing/discussion meeting.

7. PARKING, VEHICLE ACCESS AND TRAFFIC

- The area adjacent to the gate into the field must be kept clear at all times to allow pilots with mobility issues or heavy equipment — in particular hang glider pilots — to unload close to the gate. Schools must brief students and all associated personnel accordingly.
- Car-sharing amongst students is strongly encouraged. Schools using a minibus vehicle to transport students should try to ensure that they park on the south side (Midlands Gliding Club side) of the road.
- Larger vehicles including campervans, minibuses and vans with sufficient ground clearance must be parked on the south side of the road, not adjacent to the flying field.
- Vehicle trips from the top of the ridge to the bottom landing field for student retrieval should be limited to a maximum of four in any one day. If more are anticipated, schools are advised to consult the relevant landowners.

8. LANDOWNER OBLIGATIONS

- All activity takes place as part of the landowner agreements negotiated by the LMSC. Schools operating at the site do so as guests of the club and must conduct themselves accordingly.

- Any specific notifications or communications required by the owners of the bottom landing fields must be observed in full, prior to and during any training day.
- Any issues raised by landowner(s) must be reported to the Sites Manger or Sites Officer as soon as practicable.
- Schools should note that the club wishes to retain primacy in regard to relationships with the landowners. Schools must endeavour to defer to club sites personal for all landowner decision making and discussion when possible.

9. REVIEW, COMPLIANCE AND REPORTING

- A report on the 2026 training season is to be presented to the LMSC committee towards the end of the 2026 season.
- These site rules for schools are always subject to review.
- The LMSC committee reserves the right to adjust, suspend or withdraw access at any time in response to evidence or changing circumstances.
